

Beat the Die

Description: A game of chance and skill to test your summation abilities!

Rules/Procedures:

1. The moderator will roll a die and call out the number.
2. Each player will write the number down in any blank space of their choice on their addition template.
3. This will be repeated eight times, once per digit space in the addend section.
4. The final sum will be totaled from the two numbers formed by the players/numbers rolled.
5. Players may NOT erase numbers written down.
6. Numbers must be written as they are called—no holding numbers for memory and writing them down after other numbers have been rolled.
7. Whoever has a sum higher than the moderator wins!
8. Single-elimination rounds will be repeated until there are 1-2 winners.

Prizes: Pens/pencils, small toys
