

Secret Codes

Description: This minievent introduces students to code-breaking and cryptography. Students will decode secret messages and also learn to send encrypted letters to friends.

Rules/Procedures:

1. Supervisors will first teach students basic cryptography techniques.
2. Students will then be challenged with a worksheet full of hidden messages.
3. Prizes will be given to those who decode the most messages.
4. Students will then have some time to create their own secret codes to give to the other students and supervisors.

Prizes: Secret Codes puzzle books, locks, and more
